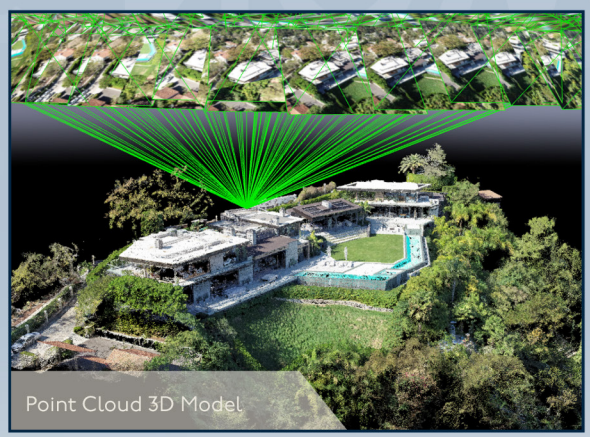
THE FUTURE IS NOW



Point Cloud 3D Model

UX-11 UAV Drone

Unmanned Aerial Vehicle (UAV) drones are undertaking complex operations with great ease. From as-built mapping and topographic surveys, to vegetation & habitat mapping, UAV drones capture data with incredible speed and accuracy.

Utilizing specialized cameras and instruments mounted on our drones, coupled with high-precision GPS, EPOCH is able to survey project areas and collect myriads of data types for processing, analysis, and design.

Orthomosaic Photography

APPLICATIONS

- Aerial Survey & Mapping
- As-Built / 3D Modeling
- Coastal Mapping
- Construction Monitoring
- Orthomosaic Photography
- Point Clouds
- Remote Sensing
- Topographic Surveys
